

Medtronic

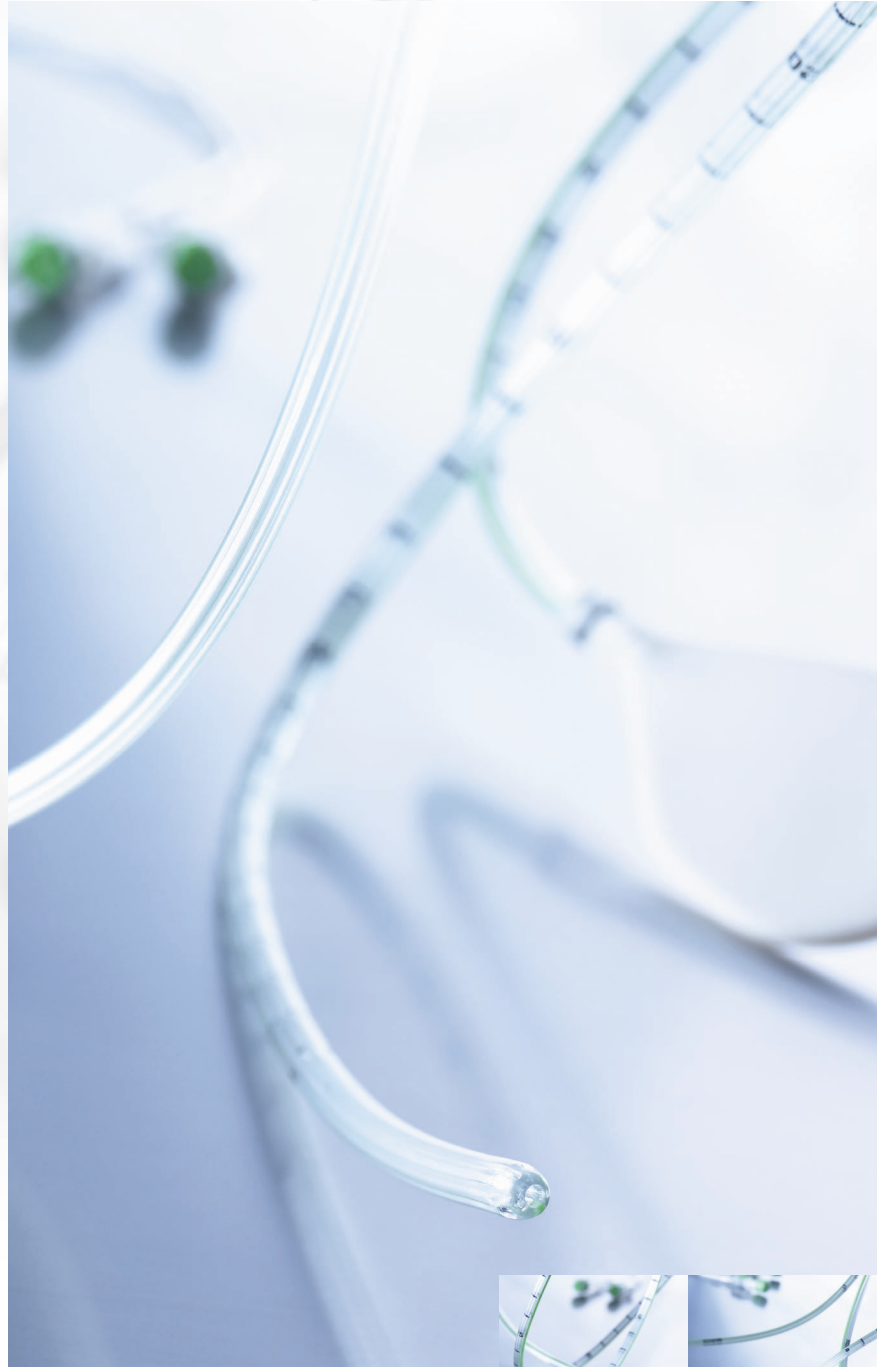

SINGLE USE MANOMETRIC CATHETERS

Medtronic offers a range of Single Use Manometric Catheters designed to meet your needs with optimal reliability and versatility. Our high-quality catheters can help you achieve a correct diagnosis with minimal patient discomfort.

The water-perfused manometric catheters are used for pressure measurement in the esophagus and for anorectal studies.

Medtronic Single Use Manometric Catheters Provide:

- A firm catheter body for easy intubation
- A wide range of standard configurations
- Green radiopaque line identifying lumen #1
- Anorectal catheters with neoprene balloon (free of natural rubber latex)
- No cleaning and disinfecting procedure
- No need for chemical disinfectants makes it safe and helps you save time

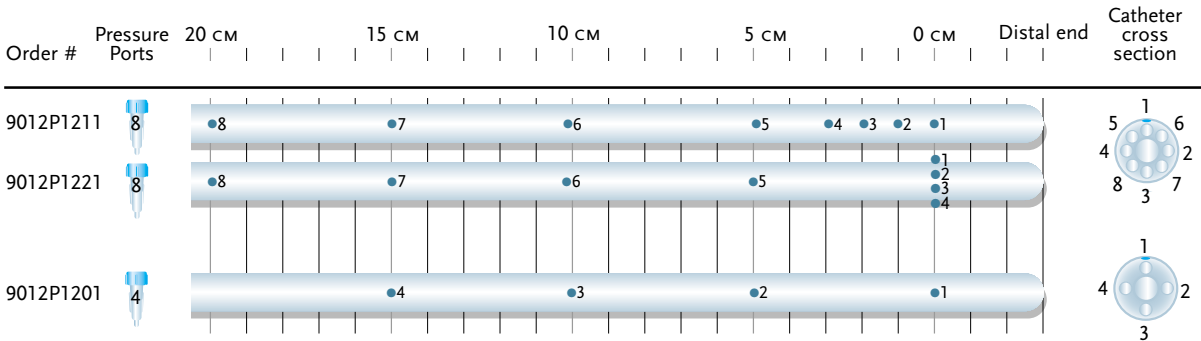

One Source. Many Solutions
